

Policy for IFSAC Representation on NFPA and Other Organization's Committees

For NFPA:

For NFPA standards recognized by IFSAC or either of its Assemblies, it is the policy of IFSAC to promote membership participation in the standards-making process. Those entities represented shall report to the COG or Chair of the respective assembly, whichever applies, on the status of the committee and/or any substantial changes to the current or previous edition of the standard.

IFSAC representation on the NFPA Correlating Committee shall be the IFSAC Manager. With the approval of the COG, the IFSAC manager should be the representative for all other NFPA committees whenever possible. However, the COG may appoint a representative from the applicable assembly when the Manager is unable to represent the organization. These individuals shall report to the COG. Where only one Assembly is affected, the Chair of that Assembly, or their designee, shall serve in this capacity.

For Other Organizational Representation

Where representation in other organizations best represents the goals of IFSAC, the Manager shall represent the organization whenever possible. If the IFSAC Manager is not able to represent IFSAC, the COG shall appoint a representative from the general membership. Where only one Assembly is affected, the Chair of that Assembly, or their designee, shall serve in this capacity.
